Dear Barry

Construction Logistics and Community Safety - Australia (CLOCS-A) Memorandum of Understanding Confirmation as a Supporting Partner

I am delighted to confirm that the Monash University Accident Research Centre (MUARC) accepts the invitation to join the CLOCS-A Memorandum of Understanding (MoU) Finalised Version 1 February 2021 as a Supporting Partner (SP).

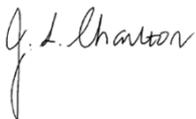

The MoU records the agreement between the Steering Group Partners and SP to form a relationship to work together in improving road safety and the operational efficiency relating to the logistics of the construction of infrastructure projects. The MoU will specifically act as a catalyst for CLOCS-A Partners to champion and guide the establishment of CLOCS-A.

MUARC is a world leader in injury prevention and disaster resilience research, underpinned by scientific and academic excellence, and is Australia's largest and most respected accident and injury prevention research organisation. A range of specialised areas are available to the CLOCS-A initiative and these include:

- biostatistics
- engineering
- human factors
- crash investigation
- industrial ergonomics
- medicine
- psychology
- public health
- statistical analysis.

In line with the MoU, MUARC enters into it in good faith and will actively support and participate in CLOCS-A activities.

Yours sincerely

15 February, 2021
