

# CLOCS-A

## Silver Requirements

A higher standard of equipment that is preferred for heavy vehicles complying with CLOCS-A technical requirements. Similar to UK CLOCS and broadly aligned to current NSW/VIC government major projects. Accreditation to Silver also requires prior accreditation to Bronze.

- No bug deflectors on bonnetted trucks – City and Urban Projects only
- No engine air intake hardware above bonnet level – City and Urban Projects only
- No large inappropriate bullbars – City and Urban Projects only
- No inappropriate sunvisors
- No overly large decals or lettering attached to any part of the windscreen that may reduce the driver's field of view
- No excessive windscreen or window tinting
- No inappropriate fitment of aftermarket accessories that restrict the driver's field of view
